

Job Description: Generative AI Intern

Location: [Remote / On-site / Hybrid]

Duration: [3–6 Months]

Stipend: No

About the Role

We are seeking a passionate Generative AI Intern to work on cutting-edge AI solutions leveraging Large Language Models (LLMs) such as ChatGPT. This role offers hands-on exposure to prompt engineering, AI application development, and real-world use cases of Generative AI across business functions.

Key Responsibilities

- Design, test, and optimize prompts for LLMs to generate accurate and relevant outputs.
- Work on use cases involving chatbots, content generation, summarization, and automation.
- Assist in integrating LLM APIs (e.g., OpenAI, Azure OpenAI) into applications.
- Evaluate model responses and improve performance through prompt refinement and iteration.
- Conduct research on emerging trends in Generative AI and LLM advancements.
- Collaborate with technical and business teams to identify AI-driven opportunities.
- Document workflows, prompt libraries, and best practices.

Required Skills & Qualifications

- Pursuing or recently completed a degree in Computer Science, AI, Data Science, or related field.
- Basic understanding of Generative AI and Large Language Models (LLMs).
- Familiarity with prompt engineering concepts.
- Knowledge of Python and working with APIs.
- Strong analytical thinking and problem-solving abilities.
- Good written and verbal communication skills.

Preferred Skills (Good to Have)

- Hands-on experience with ChatGPT, OpenAI APIs, or similar platforms.
- Exposure to NLP concepts such as tokenization, embeddings, and transformers.
- Experience with frameworks like LangChain or LlamaIndex.
- Basic understanding of REST APIs and JSON.
- Familiarity with Git and collaborative development workflows.

What You Will Gain

- Practical experience in building real-world Generative AI applications.
- Deep understanding of prompt engineering and LLM optimization.
- Exposure to cutting-edge AI tools and frameworks.
- Mentorship from industry professionals.
- Opportunity for full-time conversion based on performance.
